

---

**A simple Python function.**

---

```
1     def hello_world():
2         """Simple hello world function"""
3         print("Hello, world!")
```

Code 1: A simple Python function.

---

**A simple C++ function.**

---

```
1     void hello_world() {
2         // Simple hello world function
3         std::cout << "Hello, world!" << std::endl;
4     }
```

Code 2: A simple C++ function.
